

COME PLAY WITH ME

MARKETING STRATEGY

Tokenization and Crypto

Our tokenization model will include pay-to-earn mechanics as well as staking. We will take proceeds into the liquidity pool and redistribute for staking.

NFT Release

A collection of 5555 Killer Bunnies will be released to the public. Opportunities like OG & Whitelisting will be made available for organic marketing outreach. Large proceeds will be allocated towards social media outreach initiatives.

NFT Game Release & Trailer

The Killer Bunny game is currently in progress. Our team has already started coding various maps and stages as well as 3D modelling of the Killer Bunny character. Teasers will then be released to the public for better conceptualization of game mechanics.

PROJECT OVERVIEW

- ❖ Unique Collection of 5555 Killer Bunnies
- ❖ Staking mechanism
- ❖ Royalties for the community
- ❖ Secondary NFT Collection
- ❖ P2E NFT Game
- ❖ Tokenization
- ❖ Well equipped utilities
- ❖ Long-term sustainable project
- ❖ Low-barrier of entry to start the game

WHAT IS KILLER BUNNY?

Killer Bunny is a unique collection of 5555 Killer Bunnies. Killer Bunny was abandoned and left to survive in the streets of the Meta City. Struggling, he resorted to the act of killing and robbing. His primarily targets young children by befriending them then making his move when it gets dark at night. with the promise of gold and jewelry rewards, Killer Bunny recruits and expands his clan. A fluffle of desperate Killer Bunnies are now roaming the streets of the Meta City together, preying on young children and hunting for luxury goods.

Killer Bunny Holders receive many benefits that include, but are not limited to, staking and weekly Azure Boxes with mysterious items stolen by the Killer Bunnies. Additionally, a % of total royalties will be allocated towards the community vault that may offer rewards to Killer Bunny Holders. With a second generation of Killer Bunny Babies in the works, there are many benefits and surprises to come.

NFT GAME DEVELOPMENT

The Development of a new era - The Killer Bunny NFT game. This game will be adapted to Unreal Engine 4, allowing Killer Bunny Holders and early access pass holders to gear up as a Killer Bunny character and explore the Meta City, loot, and clear stages.

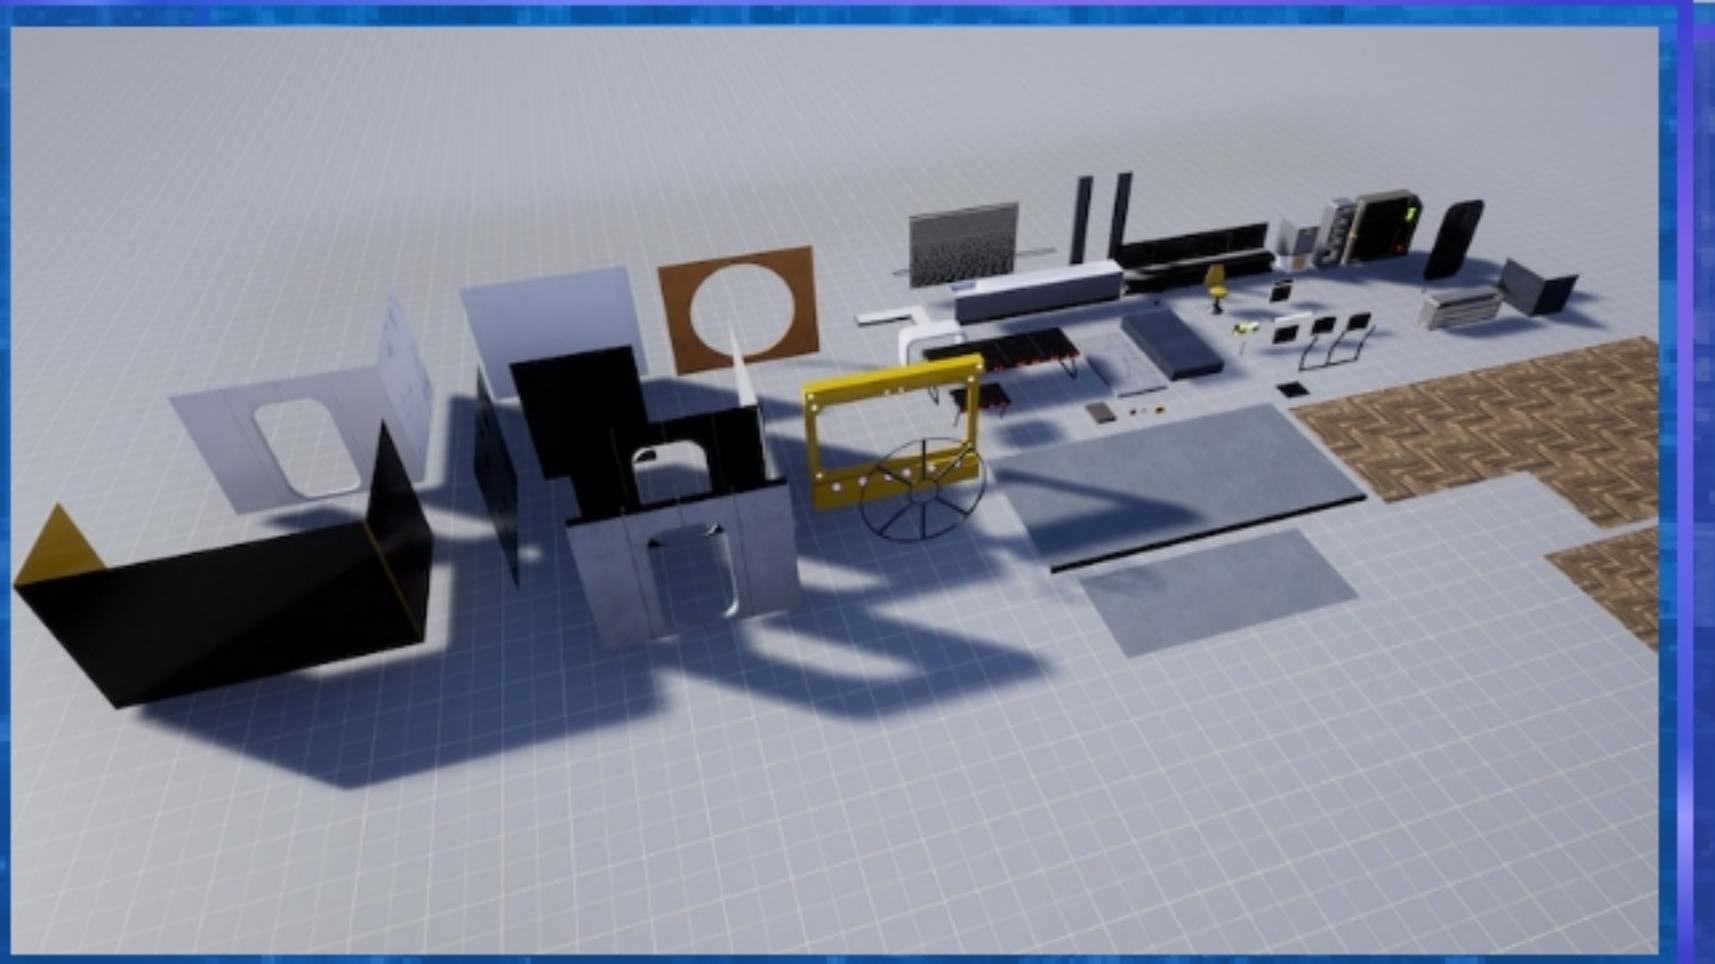

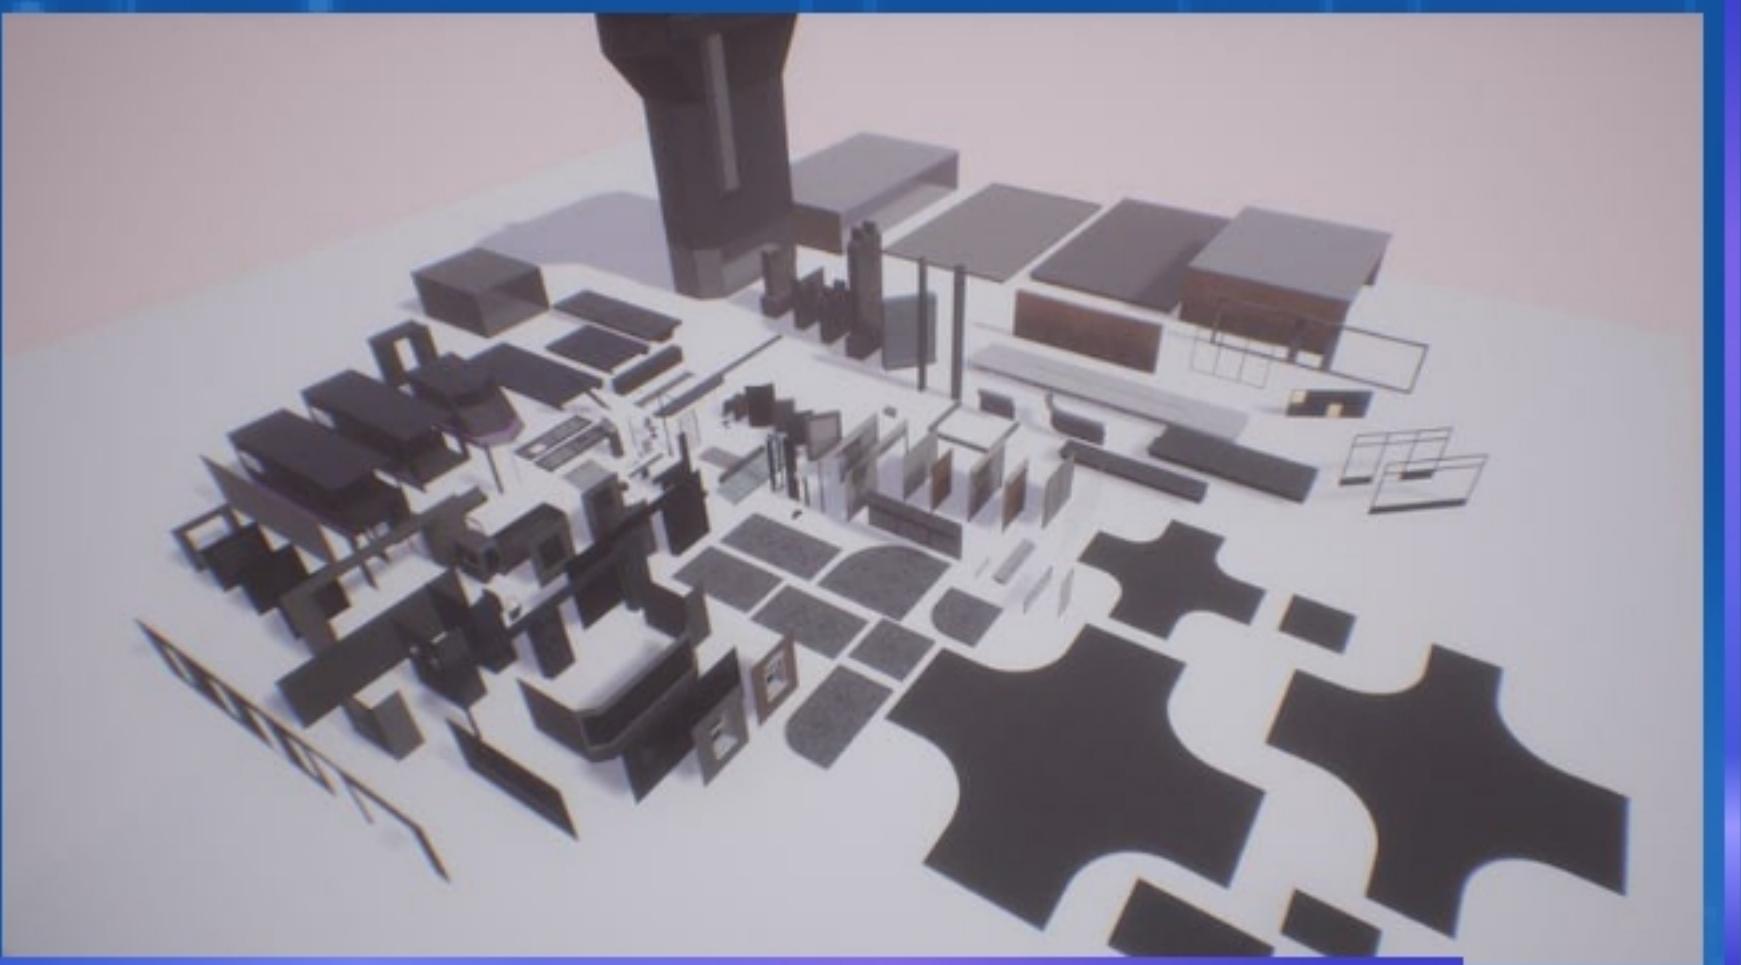

Timed, Loot and Kill. Killer Bunny Characters will be given a timeframe to loot as much as possible while keeping quiet from the residence. There are two options in exchanging loots:

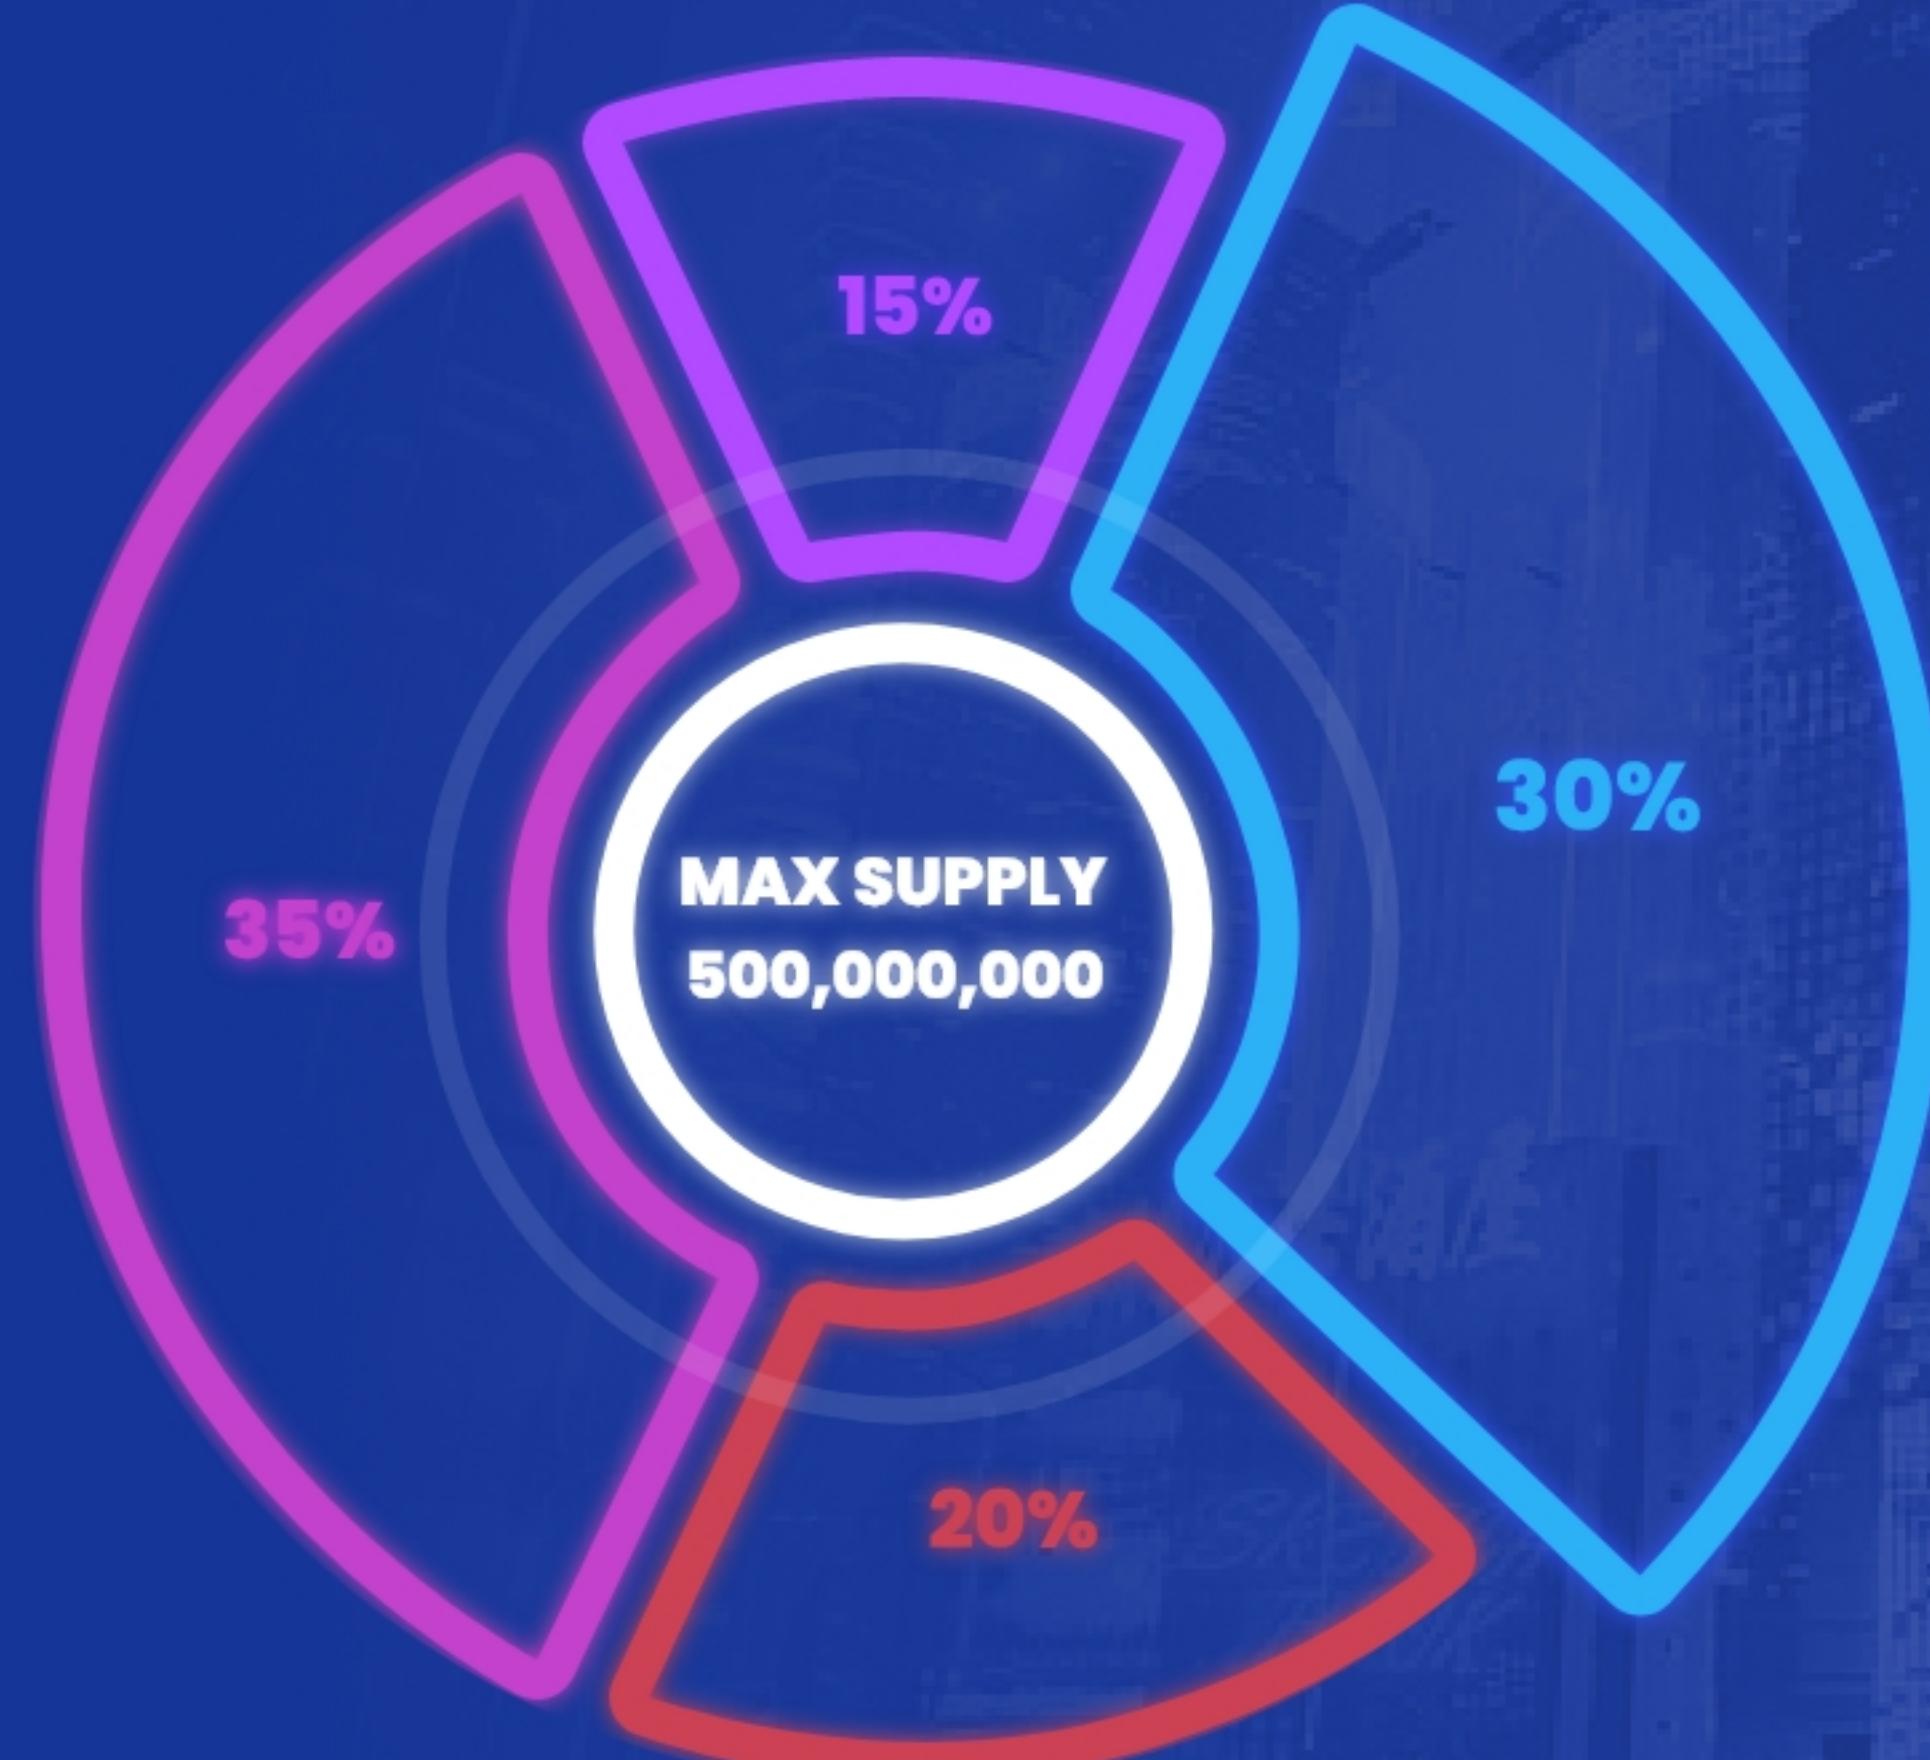

1

Exchange loots within the marketplace for better equipment that offer stronger stats because looting difficulty increases with the various stages.

2

Exchange loots for \$killerbunny tokens and earn REAL money. The more you loot, the more you earn.

TOKENOMICS

MAX SUPPLY: 500,000,000

Seed Round / Private Round : (15%) - 75,000,00

Public Sale: (20%) - 100,000,000

Ecosystem: (35%) - 175,000,000

Team & Advisor : (0%) - 0

DEX Deposit, MM, and Liquidity Incentives :

(30%) - 150,000,000

Gear Your Killer Bunny Character

Gears help increase movement speed, attack damage as well as defense.

If you break into homes and wake up the residence, they will disrupt your looting mission by trying to eliminate you. As you gear up, you will find yourself looting quicker and more easily. Remember, the more you loot, the more money you make.

Stake Your Killer Bunny NFT

Simply by holding your Killer Bunny NFT, you will be rewarded with income and many other perks.

Exchange Loots for Rewards

Take your loots to the marketplace, sell it to the vendor in exchange for two options:

1. Exchange loots within the marketplace for better equipment that offer stronger stats because looting difficulty increases with the various stages.
2. Exchange loots for \$killerbunny tokens and earn REAL money.

Timed Challenges

Upon reveal, your Killer Bunny NFT will be categorized either under "common", "rare", "epic", or "legendary". The more rare your Killer Bunny NFT is, the more time you will be given to break into homes to loot.

PLAY TO EARN MECHANICS

Advance To The Next Stage

The Killer Bunny NFT game offers various stages with increasing difficulty. Killer Bunny Characters can clear stages to advance to a higher stage for greater rewards and challenges, or repeat stages for steady income.

Items (90 results)

MARKET PLACE

The marketplace is where all the transactions take place. Make \$killerbunny tokens by selling your loots to the vendor and/or listing your equipment for sale in exchange for \$killerbunny tokens.

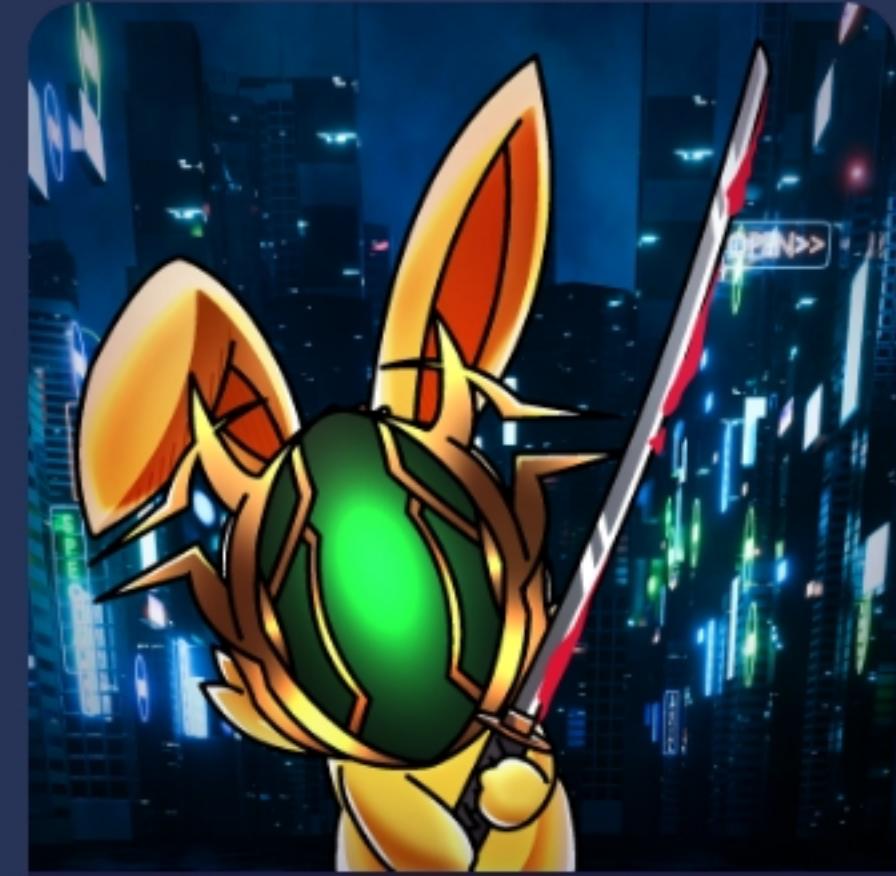

Remember, \$killerbunny tokens can also be exchanged for better equipment or be sold for REAL money.
